

Job Description

Web Developer: *We are searching for the rarest of breeds: the communicating software developer. If you have a broad programming background, an interest in developing and maintaining customized solutions, and a passion for data, this position may be just right for you.*

We are looking for an experienced web developer to create and deploy customized reporting solutions targeted to specific client needs, transfer survey data and sample into a relational database, and produce interactive online reports that summarize survey data. The ideal candidate will have a proven track record of leading and gathering scoping requirements, designing and building web reporting sites, and handling database administration. This candidate will strive to stay current on technical trends, gather or create training materials, and serve as a technology resource for other CMI staff, as needed. Our colleagues and clients expect not only high quality software, but also excellent levels of both internal and external communication and customer service.

Essential qualifications include 5+ years of programming experience using Microsoft .NET technologies - including C#, VB.NET, SQL Server, and Visual Studio, and 2+ years of experience programming with programming with relational databases; SQL Server preferred, proficient in C#, ADO.NET, ASP.NET, and Visual Studio, SQL Server (2000+) & T-SQL. Web Technologies (HTML, Javascript, etc.), MS Office Excel. Bachelor's Degree in Computer Information Systems or equivalent is required, and Masters Degree preferred.

If you meet these requirements and are looking for a collaborative environment that promotes professional growth, please email us at jgreen@cmiresearch.com. No phone calls please.

We're anxious to hear from you!
